FUEL SURCHARGE FORMULA Local, LTL, and 3-5 Day Deferred Service

The price of fuel is a major factor in the cost of moving ground shipments within the domestic United States. To protect our clients from the volatility of fuel prices, The RK Logistics Group will apply a fuel Surcharge based on the matrix published below. When the cost of fuel increases, The RK Logistics Group applies a fuel surcharge which is a percentage of the freight charges. When fuel prices trend downward, The RK Logistics Group reduces the fuel surcharge percentage based on the freight charges. The formula is simple and we believe passing on the savings is important to you!

Every Monday, the fuel index is published by the Energy Information Administration of the US Department of Energy. The price in cents per gallon may be obtained by visiting the department's web site at: <http://tonto.eia.doe.gov/oog/info/gdu/gasdiesel.asp> or call (202) 586-6966. The RK Logistics Group adjusts the index every Tuesday based on the National Average. The fuel surcharge is based on the following table:

Fuel Surcharge Ground Shipments (Percentage of Freight Charges)

Cents	Percent
483	39.20%
484	39.30%
485	39.40%
